***STATISTICAL AND ECONOMIC INFORMATION***

***REPORT 2013***

***December 2013***

### Foreword

Every year, the European Commission, Directorate General for Agriculture and Rural Development, publishes the report "Agriculture in the European Union – statistical and economic information", devoted to a wide range of topics and covering the EU Member States and the acceding and candidate countries.

This report contains information related to the macroeconomic environment as well as to the economic situation in agriculture, such as farm structures, agricultural income, markets, trade, rural development and financial aspects of both pillars "direct payments and market measures" and "rural development".

An introductory chapter provides an overview of the 2013 agricultural year, followed by detailed statistical tables on individual aspects.

## Contents

Foreword -----	3
The 2013 agricultural year -----	13
Codification of the tables -----	33
Key to symbols, names and abbreviations -----	34
Currency units used in this report -----	35
Observations on statistical method -----	39
Remarks -----	41
Statistical and economic information -----	43

### Table No

## **1 INTRODUCTION**

- 1.0.0 Euro zone
- 1.0.1 Exchange rates

## **2 BASIC DATA**

- 2.0.1.1 Basic data – key general statistics
- 2.0.1.2 Basic data – key agricultural statistics
- 2.0.1.3 Basic data – key agricultural statistics (2<sup>nd</sup> part)

## **3 ECONOMIC DATA**

### **3.1 The agricultural economy**

- 3.1.1 Shares of products in agricultural production
- 3.1.2 Individual Member States and Candidate Countries' share in agricultural production
- 3.1.3 Farm inputs: breakdown by Member State and Candidate Countries
- 3.1.4 Situation of the:
  - (a) output of the agricultural industry
  - (b) consumption of inputs
  - (c) gross added value at basic prices
  - (d) factor income
- 3.1.5 Value of agricultural production, crop production and livestock production
- 3.1.6 Evolution in output volume in the agricultural activities sector, in intermediate consumption, in gross added value (at basic prices) and in net added value (at basic prices)
- 3.1.7 Evolution in the implicit index of output prices in the agricultural industry
  - value/volume (nominal)
  - value/volume, deflated by GDP implicit price index (real)
- 3.1.8 Evolution of the implicit price index of intermediate consumption:
  - value/volume (nominal)
  - value/volume, deflated by GDP deflator (real)
- 3.1.9 Evolution in productivity of intermediate consumption and terms of trade
- 3.1.10 Gross fixed capital formation and gross value-added in agriculture at basic prices
- 3.1.12 Indices of real income from agricultural factors, per annual work unit (AWU)
- 3.1.13 Volume of agricultural labour in annual work units (AWUs)
  - 3.1.14.1 Changes in intermediate consumption by volume
  - 3.1.14.2 Input (volume) indices
- 3.1.15 Agriculture by region: major economic indicators and the share of individual products

- 3.2 **FADN**
  - 3.2.1 The farm accountancy data network – Explanatory note
  - 3.2.2 The eight types of farming: shares of each enterprise in total output
  - 3.2.3 Accountancy results by type of farming
  - 3.2.4 Results by economic size of holding in the EU
  
- 3.3 **Prices and production costs**
  - 3.3.1 Agricultural prices and amounts of Community aid (beginning of marketing year)
  - 3.3.2 Producer prices for agricultural products in the EU (excl. VAT)
  - 3.3.3 Producer price indices (excl. VAT)
  - 3.3.4 Annual rate of change of:
    - (a) consumer prices for foodstuffs and beverages
    - (b) producer prices for agricultural products
  - 3.3.5 Input prices (excl. VAT)
  - 3.3.6 Agricultural input prices and producer prices (excl. VAT)
  - 3.3.7 Price indices for feedingstuffs, fertilizers and soil improvement, fuels and lubricants, and investments in machinery (excl. VAT)
  - 3.3.8 Market value of agricultural land (parcels)
  - 3.3.9 Rents for agricultural land
  - 3.3.10 Trend of purchase prices of agricultural inputs (excl. VAT)
  - 3.3.13.1 Producer prices in the Member States and Candidate Countries
  
- 3.4 **Financial aspects**
  - 3.4.1 Budgetary expenditure on the common agricultural policy
  - 3.4.2 EAGGF Guarantee and Guidance expenditure (2004 to 2006), EAGF and EAFRD expenditure (2009) by Member State
    - 3.4.3.1 Agricultural and Rural Development' Policy Area expenditure
  - 3.4.4 Breakdown of EAGF expenditures by sector, according to the economic nature of the measures
  - 3.4.5 Quantity and value of products in public intervention stores of the intervention agencies
  - 3.4.9 Implementation of budget (Rural Development)
  - 3.4.10 National expenditures for agriculture
  
- 3.5 **Structures**
  - 3.5.1 **Employment in agriculture**
    - 3.5.1.1 Employment in agriculture: statistical sources and applications
    - 3.5.1.2 'Persons employed' in 'agriculture, hunting, forestry and fishing'
    - 3.5.1.3 Employment in agriculture and in the other sectors
    - 3.5.1.4. Employment in agriculture and in the other sectors: structures compared
      - 3.5.1.5.1 Employment in agriculture: persons working on agricultural holdings
      - 3.5.1.5.2 Employment in agriculture: breakdown by type of labour
    - 3.5.1.6 Employment in agriculture: working hours and combined other employment of farmers
    - × 3.5.1.7 Employment in agriculture: Turnover coming from other gainful activities (OGA) directly related to the holding
  
  - 3.5.2 **Land use**
    - 3.5.2.2. Main crops, by Member State and Candidate Countries
  
  - 3.5.3 **Livestock numbers**

- 3.5.3.3 Cattle numbers and number of holders
- 3.5.3.4 Changing structure of cattle farms, by Member State and Candidate Countries
- 3.5.3.5 Changing structure of cattle farms, by herd size class
- 3.5.3.6 Dairy cow numbers and number of holders
- 3.5.3.7 Changing structure of dairy farms, by Member State and Candidate Countries
- 3.5.3.8 Changing structure of dairy farms, by herd size class
- 3.5.3.9 Pig numbers and number of holders
- 3.5.3.10 Changing structure of pig farms, by Member State and Candidate Countries
- 3.5.3.11 Changing structure of pig farms, by herd size class
- 3.5.4 ***Farm structures***
  - 3.5.4.1 Number and area of holdings
  
- 3.6 **Implementation of the common agricultural policy (CAP)**
  - 3.6.1 ***Impact of CAP reform***
    - 3.6.1.1 Overview of the implementation of direct payments under the CAP in Member States
    - 3.6.1.2
      - 36121 Budgetary ceilings for Single Payment Schemes in Member States
      - 36122 Budgetary ceilings for direct payments to be granted under Article 70 of regulation (EC) No 1782/2003 and Article 87 of regulation (EC) No 73/2009
    - 3.6.1.3 Single Area Payment Scheme - areas.
    - 3.6.1.4
      - 36141 Annual financial envelopes for the single area payment scheme
      - 36142 Maximal amount of funds available for the Member States for granting the separate sugar payment referred to in article 126 of regulation (EC) No 73/2009.
    - 3.6.1.5 Budgetary ceilings for direct payments to be granted under Articles 66 to 69 of Regulation (EC) N°. 1782/2003
    - 3.6.1.14 Direct payments to the producers by size class paid by EAGF - Regulation (EC) n°1782/2003
  - 3.6.2 ***Rural development policy results***
    - 3.6.2.1 Measure: Early retirement - Regulation (EC) No 1698/2005 art. 23.
    - 3.6.2.2. Measure: Less Favoured Areas (holdings receiving compensatory allowances by pre-dominant LFA type) - Regulation (EC) N° 1698/2005 art.37
    - 3.6.2.3 Measure: Agri-environment - Regulation (EC) No 1698/2005 art. 39.
  
- 3.7 **Trade**
  - 3.7.1 World exports and EU external trade in all products, agricultural products and other products
  - 3.7.2 EU trade by product (CN chapters)
  - 3.7.3 Exports of agricultural products by the EU and some other countries
  - 3.7.4 Imports of agricultural products by the EU and some other countries
  - 3.7.5 World production and trade in the principal agricultural products – The EU share of the world market
  - 3.7.6 EU trade in agricultural products, according to principal customer countries
  - 3.7.7 EU trade in agricultural products, according to principal supplier countries
  - 3.7.8 EU imports and exports (by product and aggregate)
  - 3.7.10 EU imports of agricultural products from various groups of countries
  - 3.7.11 Agricultural product exports from the EU to various groups of countries
  - 3.7.12 EU trade with ACP countries
  - 3.7.13 EU trade with Mediterranean countries
  - 3.7.14 EU trade in agricultural products
  - 3.7.15 Intra-EU trade (by product and aggregate) on the basis of arrivals and dispatches
  - 3.7.19 EU trade with Candidate Countries

- 3.7.21 EU trade with the United States of America
- 3.7.23 EU trade with the MERCOSUR countries
- 3.7.24 EU trade with the NAFTA countries
  
- 3.8 **Consumption and self-sufficiency**
  - 3.8.2 Human consumption of certain agricultural products
  - 3.8.3 Self-sufficiency in certain agricultural products

## 4 AGRICULTURAL MARKETS

### 4.1 Cereals

- 4.1.1.1 Area, yield and production of common and durum wheat
- 4.1.1.2 Area, yield and production of rye and barley
- 4.1.1.3 Area, yield and production of oats and mixed cereals and maize
- 4.1.1.4 Area, yield and production of other cereals and total cereals (excluding rice)
- 4.1.2.1 World production of cereals and production in main exporting countries
- 4.1.3.1 The EU's share in world cereals trade
- 4.1.4.1 Supply balances– durum wheat– common wheat
- 4.1.4.2 Supply balances– barley– rye
- 4.1.4.3 Supply balances – maize– oats
- 4.1.4.4 Supply balances – other cereals– total cereals (excluding rice)
- 4.1.5.1 Producer prices of certain cereals
- 4.1.5.5 Cif Rotterdam prices for cereals
- 4.1.6.2 Market prices for cereals as a percentage of the intervention price
- 4.1.6.3 Intervention stocks in the EU at the end of the marketing year

### 4.2 Rice

- 4.2.1.1 Area, yield and production of rice (paddy)
- 4.2.4.1 Supply balance – rice
- 4.2.5.1 Cif Rotterdam prices for long-grain rice
- 4.2.6.1 Market prices for Community paddy rice compared with intervention prices

### 4.3 Sugar

- 4.3.1.1 Area under sugarbeet, yield and production of sugar
- 4.3.2.1 World production of sugar and production of the main producing and/or exporting countries
- 4.3.3.1 World supply balance and international trade in sugar
- 4.3.6.1 Sugar and isoglucose production, by quota

### 4.4 Oilseeds, oils and fats

- 4.4.1.1 Area, yield and production of: rapeseed; sunflower seed; and soya beans in the EU
- 4.4.3.1 Internal and external trade of: rapeseed; sunflower seed; soya beans; and flax seed
- 4.4.4.1 Supplies of rape and colza (seed, oil, cake)
- 4.4.4.2 Supplies of sunflower (seed, oil, cake)
- 4.4.4.3 Supplies of soya (seed, oil, cake)
- 4.4.4.4 Supplies of olive oil
- 4.4.5.1 Fixed prices and average market prices in Greece, Spain and Italy for olive oil
- 4.4.5.3 Average monthly prices for oilseed products

### 4.5 Fruit and vegetables

- 4.5.1.1 Area, yield and harvested production in the EU and Candidate Countries of: (a) fruit; (b) citrus fruit; (c) vegetables
- 4.5.3.1 Intra-EU trade and external trade in fresh fruit and vegetables
- 4.5.5.1 Producer prices of certain types of fruit and vegetables

### 4.6 Wine

- 4.6.1.1 Area under vines, yield and production of wine and must
- 4.6.3.1 Trade in wine and share in world trade
- 4.6.4.1 Supply balance – wine

### 4.7 **Potatoes**

4.7.1.1 Area, yield and production of potatoes

### 4.8 **Tobacco**

4.8.1.1 Area, yield and production of leaf tobacco, by groups of varieties

4.8.3.2 EU tobacco exports to third countries

### 4.9 **Seeds**

4.9.1.2 Seed areas accepted for certification

### 4.10 **Hops**

4.10.1.1 Number of holdings, area, yield and production of hops in the EU

4.10.4.1 Market balance – hops

### 4.11 **Fibre flax, cotton and silkworms**

4.11.1.2 Area, yield and production of fibre flax and hemp

4.11.1.3 Output of silkworm cocoons and number of boxes of silkworm eggs used

4.11.3.2 Intra-EU trade and external trade in cotton fibre

4.11.5.3 Ginned cotton, world prices

### 4.13 **Feedingstuffs – Fodder**

4.13.7.3 Industrial production of compound feeding stuffs, by species and by Member State and Candidate Countries

4.13.7.8 EU supplies of dehydrated and dried fodder

4.13.7.9 Area, yield and production of dry pulses, feed peas and field beans in the EU and Candidate Countries

4.13.7.12 Cif offer price (Rotterdam) for Brazilian soya cake

### 4.14 **Meat in general**

4.14.1.1 Gross internal production and consumption of meat

4.14.3.1 Net balance of external trade in meat and self-sufficiency

### 4.15 **Beef/veal**

4.15.0.1 Cattle numbers (December of previous year)

4.15.1.1 Slaughterings of adult bovine animals, calves and young cattle

4.15.1.2 Net production of beef/veal in the EU (adult bovine animals calves and young cattle)

4.15.2.1 World production and production of principal beef/veal producing/exporting countries

4.15.3.1 Beef/veal – EU trade by species

4.15.3.2 Beef/veal – trade with non-member countries

4.15.4.1 Supply balance – beef/veal

4.15.5.1 Market prices for beef/veal

### 4.16 **Pigmeat**

4.16.0.1 Pig numbers (December of previous year)

4.16.1.1 Number of pigs slaughtered

4.16.1.2 Net pigmeat production

4.16.2.1 World production and gross domestic production of main pigmeat-producing or exporting countries

4.16.4.1 Supply balance – pigmeat

4.16.5.1 Market prices for pigmeat

### 4.17 **Sheepmeat and goatmeat**

- 4.17.0.1 Sheep and goat numbers (preceding December)
- 4.17.1.1 Sheep and goats slaughtered
- 4.17.3.1 Sheepmeat and goatmeat – EU trade, by species
- 4.17.3.2 Sheepmeat and goatmeat – trade with non-member countries
- 4.17.3.3 Imports of sheepmeat and goatmeat
- 4.17.4.1 Supply balance – sheepmeat and goatmeat
- 4.17.5.1 Market prices for sheepmeat
- 4.18 **Poultrymeat**
- 4.18.0.1 Number of utility chicks of table strains hatched
- 4.18.1.1 Gross internal production of poultrymeat
- 4.18.3.1 Trade in poultrymeat with non-member countries
- 4.18.4.1 Supply balance – poultrymeat
- 4.18.5.1 Market prices for chickens
  
- 4.19 **Eggs**
- 4.19.0.1 Laying hens, numbers
- 4.19.0.2 Number of utility chicks hatched from laying hens
- 4.19.1.1 Usable production of eggs (total eggs)
- 4.19.3.1 Trade in eggs with non-member countries
- 4.19.4.1 Supply balance – eggs (total eggs)
- 4.19.5.1 Market prices for eggs
  
- 4.20 **Milk and milk products**
- 4.20.0.1 Dairy herds and yield
- 4.20.1.1 Production of cows' milk and delivery to dairies
- 4.20.1.2 Deliveries of cows' milk to dairies, as a proportion of cows' milk production
- 4.20.1.3 Production of fresh milk and fresh milk products by the dairy industry
- 4.20.1.4 Production in dairies of butter and cheese
- 4.20.1.5 Production in dairies of milk powder
- 4.20.1.6 Production in dairies of concentrated milk and casein
- 4.20.2.1 World exports and production of– butter– cheese– casein
- 4.20.2.2 World exports and production of– whole-milk powder and skimmed-milk powder –  
Condensed milk
- 4.20.3.1 World trade in certain milk products – EU share
- 4.20.4.2 Detailed supply balance – skimmed-milk powder
- 4.20.4.3 Detailed supply balance – butter
- 4.20.5.1 Milk producer price
- 4.20.6.1 Intervention measures for butter and skimmed-milk powder
- 4.20.6.2 Application of the quota system (quotas for deliveries)
- 4.20.6.3 Community butter and skimmed-milk powder stocks
  
- 4.21 **Honey**
- 4.21.4.1 Supply balance – honey
  
- 4.22 **Wood**
- 4.22.1.1 Basic forest resources
- 4.22.3.1 EU external trade in forest products
- 4.22.3.2 EU external and intra-EU trade in timber and timber products by Member State
  
- 4.23 **Genetically modified organisms (GMOs)**

4.23.1.1 World areas sown to GMOs by country

4.23.1.2 World areas by crop (GMOs)

### 4.24 **Quality policy**

4.24.9.1 Protected designations of origin and protected geographical indications  
(Regulation (EC) no 510/2006): record of names registered

4.24.9.2 Certified and policy – supported organic and in conversion land area

4.24.9.3 Number of certified and policy – supported organic and in conversion farms

× = New table : 3.5.1.7

Remark:

The following tables of ***The Agricultural Situation in the European Union – 2012*** have not been repeated: 3.6.1.7, 3.6.1.8, 3.6.2.4, 3.6.2.5, 4.3.5.1, 4.5.6.1 4.7.1.2, 4.8.3.3, 4.9.1.1

European  
Commission

***Introduction***

***Methodology***

### THE 2013 AGRICULTURAL YEAR

#### General overview

After three years of recovery, the EU-28 **real agricultural income** per labour unit<sup>1</sup> decreased in 2013 by 1.3% year-on-year driven by declines in both factor income and agricultural labour force (-2.1% and -0.9%, respectively). The agricultural income varies significantly across the European Union: the highest increases are estimated in the Netherlands (+11.4%), Romania and Spain (around 10% each), while the highest decreases are estimated in Estonia (-17%), France and Croatia (each by -16%).

In 2013, the EU-28 **value of agricultural output** remained unchanged in real terms with the positive performance of animal output value (+1.5%) offsetting the reduction in crop production (-1.1%). The decline in value in the crop production is due to a drop in real prices (-3.7%) partly offset by an increase in volumes (+2.7%). Higher volumes were registered for cereals and oilseeds (by more than 6% each), potatoes (+1%), fruits and wine (by around +7% each) while olive oil output declined steeply by 31%. Producer prices for crops are projected to decline substantially in real terms in 2013 as compared to 2012, notably for cereals (-14%) and oilseeds (-15%), while increasing for potatoes, fruits, wine and olive oil.

The growth in the value of animal production (+1.5%) in 2013 is the result of an increase in real producer prices (+1.6%) while production volumes remained unchanged. Producer prices increased for most animal and animal products category (cattle +0.8%, pigs +1.7%, poultry +2.7%, milk +5.8%) except for sheep (-2.7%) and eggs (-17%). Volumes fell for sheep and goats (-2%), cattle (-0.9%) and pigs (-0.7%) and increased for poultry (+0.9%) and eggs (+3.7%). Intermediate consumption (agricultural input costs) for the EU-28 is estimated to have increased by 0.8% mostly due to an increase in value for feedingstuffs (+1%), maintenance of materials (+2%) and seeds and planting stocks (+2.5%).

The **EU economy** revealed the first signs of recovery in 2013 with a stable Gross Domestic Product<sup>2</sup> (after falling by 0.4% in 2012). Nevertheless, this figure hides a different development across the EU countries: the highest level of growth rate is expected in three of the fastest-growing economies in the European Union, the Baltic States (Latvia 4%, Lithuania 3.4% and Estonia 1.3%) while the strongest declines are expected to continue in Cyprus (-8.7%) and Greece (-4.0%). Overall consumer price inflation in 2013 is estimated at 1.5%, while annual food price inflation stood at 2.8%. The Euro appreciated against the US Dollar in 2013 averaging 1.32 \$/EUR (+2% as compared to 2012).

Estimated **agricultural trade**<sup>3</sup> data shows an impressive development in 2013 with a net trade of around 19 billion EUR driven by higher exports (+4%) on reduced imports (-2%). EU agricultural exports are estimated to reach around 118 billion EUR in 2013 with final products accounting for the highest share of total EU exports in terms of value

<sup>1</sup> Source: Eurostat, Economic Accounts for Agriculture (EAA)

<sup>2</sup> Sources: EU GDP - Eurostat

<sup>3</sup> A report with complete 2013 figures will be published in 2014 at the following address:  
[http://ec.europa.eu/agriculture/statistics/trade/index\\_en.htm](http://ec.europa.eu/agriculture/statistics/trade/index_en.htm)

## The 2013 Agricultural year

(almost 65%) increasing by 2%; the increase is particularly evident for "Cereal preparations" (+9%) and dairy produce (+5%). The US remained the first EU destination with a total value of 15 billion EUR (or 13% of the total) and whose main exported products belonged to the category of beverages, "liqueurs and spirits" and "wine and vermouth". The value of the 2013 EU agricultural imports is expected to fall to around 100 billion EUR. Final products accounts as well for the highest share in total agricultural imports (nearly 50%) out of which the most imported products were the "tropical fruits and spices" (+7%), "fresh and dry fruits" (+5%) and "fresh and chilled vegetables" (+1%). The main origin remains Brazil which accounts for 13% of total EU agricultural imports whose main imported products consist of animal feedingstuffs and oilseeds (mainly soybeans) and the category "coffee, tea and mate".

### Overview on agricultural markets<sup>4</sup>

In 2013 the EU-28 area cultivated under **cereals (excluding rice)**<sup>5</sup> has recorded only a slight increase by 0.3% (reaching 57.8 million ha) compared to the previous campaign. However, all major individual crops have seen an increase in harvest from last year, up by more than 8% on average bringing the EU-28 total usable production to 301.5 million tonnes (+8.2%). In this figure, common wheat, representing 45% of all cereals, accounts for a production of 134.9 million t (+8.3% higher than last year), grain maize representing 21%, for 64.3 million t (+8.2%) and barley representing 20%, for 59.6 million tonnes (+9.6%). The increase in production is explained by good yields as in Germany and UK, a full recovery from last year drought-which affected maize performances in Spain, Romania and Hungary, a substitution of minor cereals with most performing varieties (for instance more triticale and rye in Poland) and a mix of increased areas and good yields as in France. The good picture has been partially offset by a reduction in production in Italy (-19%). In summary, the new harvest is likely to resolve the tight stock situation at the end of the 2012/13 season.

Sown acreage of **oilseeds** in 2013 recovered from the low level in the previous year, at 11.5 million ha for the EU-28. This, combined with general average yields, lead to an expected harvest of 29.8 million t (+9.2%). The main contributor to this figure is rapeseed with a harvest at 20.5 million t (+6.8%), followed by sunflower at 8.2 million t (+15.7%), which experienced favourable weather conditions and good yields, especially in southern Europe.

The production of **protein crops** in 2013 is expected to recover from last year's low (+13% to 2.6 million t) but to remain considerably below the preceding five-year average. In the United Kingdom a strong increase of broad bean sowings occurred in spring 2013, partly fuelled by the general slow autumn sowings in 2012.

The EU **rice** production reached 1.89 million t (milled basis) in 2012/13, i.e. the same level as one year before or 4% more than the 5-year average. Rice area with 467 000 ha in 2012/13 were down 2 % from the record level a year before, but favourable yields (6.6 t/ha on paddy basis) could compensate for this smaller decrease.

---

<sup>4</sup> The reader should bear in mind the different marketing years (i.e. from harvest to harvest) for the agricultural products: cereals, oilseeds and olive oil (July-June), rice (September-August), sugar (October-September) and wine (August-July).

<sup>5</sup> Short Term Outlook for arable crops, meat and dairy products, Autumn version available at: [http://ec.europa.eu/agriculture/markets-and-prices/short-term-outlook/pdf/2013-09\\_en.pdf](http://ec.europa.eu/agriculture/markets-and-prices/short-term-outlook/pdf/2013-09_en.pdf)

## The 2013 Agricultural year

The estimated consumption reached 2.52 million t in 2012/13, which largely corresponds to the previous marketing year as well as to the 5-year average. The estimated stocks at the end of the marketing year (31 August 2013) were 0.55 million t, up 11 % from the year before. No intervention stocks have been available since 2005/06. The rice imports increased from 0.87 in 2011/12 to 0.93 million t in 2012/13, whereas exports remained stable at 0.18 million t.

The major EU prices remained within the range of EUR 270-300/t (with Indica quotations slightly lower than Japonica) in 2012/13, i.e. 90-100% above the reference price.

As the 2013 harvest concerns, the EU output is expected to decrease to 1.71 million t, down 9 % from the previous year or 8 % less than the 5-year average. Compared to 2012, a decrease is expected both in terms of areas (down 8% to 427 000 ha) and yields (down 1% to 6.8 t/ha).

According to the International Sugar Organization (ISO), global **sugar** production amounted to 183.6 million t in 2012/2013, 8.5 million t more than in 2011/2012. Sugar consumption reached 173 million t, thus the campaign 2012/2013 resulted in a global sugar surplus of 10.6 million t.

This situation is expected to continue in the marketing year 2013/2014, when sugar production is expected to reach 181.5 million t (-2.1 million t lower than in 2012/2013), whereas consumption would increase to 176.7 million t. Thus, 2013/2014 would bring again a surplus of about 4.7 million t.

In the 2012/2013 marketing year the EU production of sugar and isoglucose under quota reached 14 million t plus an additional 4.8 million t of out-of-quota sugar and isoglucose, of which 0.6 million t released on domestic market. The overall sugar and isoglucose consumption would be 16.7 million t plus 2.2 million tonnes out-of-quota (November 2013 estimate). In order to ease fluidity on the EU market the Commission took several exceptional measures for the 2012/2013 marketing year, notably releases of out of quota sugar on the EU market (0.6 million t) and import tenders at reduced levy for a total of 0.55 million t (0.372 million t of raw sugar and 0.264 million t of white sugar). The carry forward of sugar from 2012/2013 to 2013/2014 is estimated at 0.68 million t.

According to preliminary forecasts for 2013/2014, the EU sugar beet area would reach 1.46 million ha (-2.3 % less than in 2012/2013 marketing year). The production under quota would be fully used and reach 14.2 million t of which 0.7 million t for isoglucose.

Sugar prices were not extremely volatile in 2013. World market prices for white sugar ranged from 410 EUR/t in March 2013 to 320 EUR/t in December 2013. On 1 October 2009 the white sugar reference price reached EUR 404/t, its final level following the 2006 sugar reform. The average EU market price for sugar increased significantly in 2011/2012. In 2013 the price started at an all-time high of 738 EUR/tonne in January and gradually reduced towards 659 EUR/tonne in October 2013. The difference of quotation between the London 5 in Euro and the EU community price for sugar stayed above 300 EUR /t in 2013.

Production declarations for the 2012/2013 marketing year indicate a total **must** production for wine and grape juice at about 144.5 million hl (12% lower than the

## The 2013 Agricultural year

previous year) of which 138.8 million hl were vinified. This represents the lowest level in wine production in several years when three of the most important producer countries recorded strong declines (Italy -7% to 41.5 million hl, France -21% to 40.6 million hl and Spain -10% to 33.5 million hl).

As result of the lower production level the overall stock level decreased by 4.1 million hl (-2.6%). Stocks of PDO wines have decreased during the 2012/2013 campaign by 3.9 million hl, stocks of "other wines" increased with 7% reaching at the end of the campaign 33 million hl, corresponding to 9 months of human consumption.

In July 2013, at the end of the 2012/2013 campaign, Spanish red regular wines without PDO/PGI<sup>6</sup> were marketed at 4 EUR/hectograde (+54% compared to the last year) after having reached 5 EUR/hectograde at the beginning of the campaign. French and Italian regular red wines without PDO/PGI increased up to EUR 5/hectograde (+25%) and remained stable during the whole campaign. Quotations for white regular wines without P.D.O/P.G.I are often based on insufficient volumes to be considered truly representative.

Due to lower production and higher prices the 2012/2013 exports declined in volume terms by 10% reaching 21 million hl, whereas imports increased by 4% to reach 15 million hl during the campaign 2012/2013 compared to the previous year. Exports in value increased by 2% to around EUR 9 billion resulting in a positive trade balance of EUR 6.5 billion, an increase of 2.5% compared to 2011/2012.

2013 was in global terms a positive year for the **fruit sector** and less positive for some greenhouse vegetables. No major crisis shook EU production and prices maintained a balanced level. The 2013 EU peaches and nectarines production was 7% lower compared to previous harvest and 8% drop with regards to the last five years due to the unfavourable weather conditions. Italian production decreased, mostly due to a long, cold and rainy spring. The exception is overall Spanish production which was favourable despite the losses suffered as a result of the February frost. Early and mid-season peaches production increased, mainly due to good flowering and fruit set, as well as the entry into production of new varieties. As regards prices, the campaign was positive, with increases in prices in the main producing Member States, ranging from +6% to +23%. This positive trend in prices is mainly due to the limited supply linked to the bad weather conditions recorded this spring. Apricots production registered a reduction after the record level of last year but in line with the last five years.

The 2013/14 apples and pears campaign started with good prices in autumn, with levels much higher than the average of the previous campaigns. Polish prices for apples started with a level 2.5 times higher than last year. Latest estimates set the total EU apples production at 10.8 million tonnes (+7% compared to last year) and 2.2 million tonnes for pears (+18% compared to the previous season). The Polish crop is expected to decrease from last season's bumper crop. Early varieties registered a later start by ca. two weeks in most of the regions due to the adverse weather conditions. The hail, frost and summer heat which hit some areas restricted fruit size. In 2012/2013 citrus fruit production was 9% below the previous season with around 10 million tonnes and 10% below the average last ten years. Oranges decreased by 10%, lemons by 11%. Orange's prices decreasing

---

<sup>6</sup> Protected Designation of Origin (PDO) and Protected Geographical Indication (PGI)

## The 2013 Agricultural year

and fluctuating in the first half of the year rose in the second part; same trend for lemons. Positive export with +18% for oranges and +4% for lemons compared with previous season. The EU citrus production for the 2013/14 campaign is forecasted at 10.7 million tonnes, 6% more than previous campaign. In Spain, the main EU citrus producer, production is expected to fall down by 11%, whereas in Italy there will be an increase of 10%. Prices at the beginning of the campaign were satisfactory. The end of 2012/2013 tomatoes winter campaign (January-May) was characterised by fair prices with no particular problem affecting the sector. However although summer campaign started for northern countries with optimal conditions, the situation quickly deteriorated along the weeks due to bad weather conditions, not stimulating consumption and disrupting production. Furthermore an increase in production was registered in many countries and hence intra EU exchanges could not take place regularly. This situation was a bad driver for the beginning of winter campaign which registered stagnating prices for several weeks. Furthermore overlap of season between the summer season and the winter season further deteriorated the already fragile market. 2013 potatoes production was lower than the average and this led to increased prices.

According to preliminary data, comparing the first 10 months of 2013 with the same period of 2012, EU imports of fresh and dried fruit and nuts increased by 5.3% to around 10.2 million tonnes in 2013, reversing from the previous years. As usual, bananas (+6%) and other tropical fruit (+3%) account for more than a half of the imported volumes (53%). Imports of nuts (tropical and non-tropical) increased by 8% compared to 2012. Concerning those products, mainly imported to complement the EU seasonal production, citrus fruit increased by almost 2.6% representing 17% of the total fruit import, pip fruit increased by 27% (9% of the total import), and stone fruit increased by 13% while representing only 1.6% of the total imported fruit.

In the first 10 months of 2013, EU exports of fresh or dried fruit and nuts reached 3.1 million tonnes, -5% above the same period of 2012. With Russia as the main destination, exports of fresh apples and pears increased by -7%, representing pip fruit almost 50% of the total export. Citrus export 17% of the total export remained quite stable between 2013 and 2012. Peaches and nectarines decreased by 15% reversing the trend.

In the first 10 months of 2013, the EU imported slightly more than 1.3 million tonnes of fresh vegetables, which represents an increase of 1.8% compared to 2012 (excluding potatoes). Main imported products are tomatoes (-3.6%) representing 24% of the total vegetables import, onions, shallots and garlic (+6%) representing 23% of the total, leguminous vegetables (+10%) representing 13% and sweet peppers (-6.5%) representing 12%. Potatoes import increased by 33.6% compared to 2012 and reached 447 thousand tonnes.

EU exports of fresh vegetables increased by 12.5%, making up for 1.7 million tonnes in the first 10 months of 2013 (excluding potatoes). The main products exported are onions, shallots and garlic (+4.7%) representing a share of 39% of the total export, followed by tomatoes (+35.6%), 18% of the total export, brassicas (+9.2%) and sweet peppers (-0.6%). Export of potatoes decreased by 16.1%, to 663 thousand tonnes.

2012/2013 marketing year was marked by a very low production in Spain, which affected the trade balance and price development on the EU olive oil market. According to data

submitted by producing countries, **olive oil** production in the 2012/2013 marketing year reached 1.5 million t (616 300 t produced in Spain, 415 500 t in Italy, 357 900 t in Greece, 59 100 t in Portugal, 5 600 t in Cyprus, 4 800 t in France and 200 t in Slovenia). Compared to 2011/2012, this quantity represents a 38% decrease. During the same period, the average price for extra virgin olive oil oscillated around 2 603 EUR/t (20% increase compared to the previous campaign). Regarding trade flows between EU and third countries, imports reached 144 900 t (increase by 75% compared to 2011/2012), while exports amounted to 507 600 t (3% lower than in 2011/2012).

As for the EU **beef** sector, December 2012 survey indicated a halt in the declining trend of cattle herd against the previous year (+0.5%). The livestock numbers marginally decreased in most of the EU producer countries (Germany: -0.2% and France -0.4%) with a more pronounced decline in Spain (-2%) while increases were recorded in Ireland (+5.5%), Italy (3.3%), the UK (0.5%) and Poland (0.4%). According to latest forecasts<sup>7</sup>, the 2013 EU beef and veal production will decline by around 3% against 2012 totalling 7.6 million t in 2013. With less beef on the market, high prices and protectionist measures taken by the main EU beef destination (Russia and Turkey), beef exports contracted by 30% year-on-year while beef imports into the EU in 2013 are expected to be 10% higher than 2012 driven by short-supplied market conditions. The overall EU beef and veal consumption in 2013 is expected to decline further and per capita consumption to situate at 10.7 kg retail weight<sup>8</sup>. Producer prices recorded new highs throughout the first half of 2013 for all categories (young bulls price at 3 967 EUR/t in January, steers at 4 474 EUR/t in June, cows 3 971 EUR/t in July and heifers at 4 206 EUR/t in June).

The EU **pig** herd contracted by -1.9% as indicated by the December 2012 survey (compared to December 2011) with a more pronounced reduction for breeding sows (-4.2%). High feed costs throughout 2012 and the first half of 2013 together with the new welfare rules in the sow sector were the main drivers for such a low output for the second year in row (with pig meat production declining by -1.2% in 2013 after -2% in 2012). On the export side, tight supplies led to lower volume in 2013, -2.1% when compared to 2012: the EU would export around 2.1 million t of pig meat, representing nearly 10% of the domestic production. Russia, China and Japan will represent the main export destinations (nearly 60% of EU pig meat exports). Pig meat imports into the EU, although marginal, increased to 17 000 t in 2013, 4% up compared to 2012. Pig meat consumption is estimated to decrease in 2013 and *per capita* consumption to reach 30.8 kg retail weight<sup>9</sup>. The 2013 EU average carcass price up to November of 1 764 EUR/t was around 4% more than a year before.

**Poultry meat** production is estimated increase by about 1% in 2013 to reach 12.7 million t. Imports exceeded the 2012 level by 3.4% with Brazil remaining the first trade origin. EU exports are expected to increase further (+1% compared with 2012), in particular due to a strong demand in Saudi Arabia, South Africa and Benin. EU broiler prices after rising steeply during the summer months, around 2 000 EUR/t, started to relax somewhat as of September driven by lower feed prices implied by the availability of

---

<sup>7</sup> Short Term Outlook for arable crops, meat and dairy products, Autumn version available at: [http://ec.europa.eu/agriculture/markets-and-prices/short-term-outlook/pdf/2013-09\\_en.pdf](http://ec.europa.eu/agriculture/markets-and-prices/short-term-outlook/pdf/2013-09_en.pdf)

<sup>8</sup> Coefficient to transform carcass weight into retail weight is 0.7 for beef and veal.

<sup>9</sup> Coefficient to transform carcass weight into retail weight is 0.78 for pig meat.

the new crop. EU poultry meat consumption in 2013 is estimated to increase further with *per capita* consumption situating at 21.3 kg retail weight<sup>10</sup>.

EU **sheep meat** production in 2013 is estimated to continue declining albeit at a slower pace than in the past with an estimated -0.8% against 2012. Regarding trade, sheep meat imports in 2013 increased by 9% due to higher shipments from New Zealand while export volumes are expected to increase to 30 000 t thanks to a strong demand from Hong-Kong. EU sheep meat consumption maintained stable with *per capita* consumption situating at 1.9 kg retail weight<sup>11</sup>. Higher prices in 2013 were recorded as well for the sheep meat as for the other meats category: the EU average price of light lamb in 2013 up to November was 5 895 EUR/t carcass weight (-1% compared to the corresponding period in 2012) while the price of heavy lamb amounted to 4 905 EUR/t carcass weight (-3% against 2012).

High prices and tight supply characterised as well the **milk and dairy products market** in 2013. The low milk collection in the EU, on the one hand, and in New Zealand and Australia, on the other hand, fuelled a strong increase in domestic prices pushing them to new highs. Milk price remained above the level of previous years with its highest level recorded in October 2013 at around 40 EUR/100 kg (+16% compared to October 2012). Prices for butter, Skimmed Milk Powder and Whole Milk Powder followed the same increasing trend and, driven by robust world demand, stayed above 2012 level throughout 2013.

December 2012 survey indicated an increase of 0.7% in the EU-28 dairy herd (totalling around 23 million heads). The increase is particularly strong in Italy and the Netherlands whereas significant decreases are recorded in Poland and Spain. Provided that good market conditions are expected to characterise the second part of 2013, milk production could slow down the strong declining trend set at the beginning of 2013 and reach 152.3 million t overall (-0.2% compared to 2012). The average yield per dairy cow is expected at 6 439 kg (+0.2% against 2012), led by a strong increase in EU-N13.

According to recent estimates<sup>12</sup>, **milk** deliveries to dairies should reach 140.4 million t in 2013 (+0.2% compared to 2012) with the increase taking place mostly in EU-15 while milk deliveries may decrease by 0.7% in the EU-N13 mainly driven by declines in Czech Republic and Hungary.

EU **cheese** production is estimated at 9 325 million t for 2013, corresponding to an increase of around 1% against 2012. Domestic demand and exports are expected to keep increasing. Per capita consumption could reach 16.9 kg while exports could increase to 806 000 t (+5% compared to 2012).

EU **butter** production is estimated to increase by 15 000 t and amount to 2.27 million t in 2013. EU butter exports are estimated at 119 000 t and per capita consumption is likely to slightly improve compared to 2012 (4.3 kg).

---

<sup>10</sup> Coefficient to transform carcass weight into retail weight is 0.88 for poultry meat.

<sup>11</sup> Coefficient to transform carcass weight into retail weight is 0.88 for sheep and goat meat.

<sup>12</sup> Short Term Outlook for arable crops, meat and dairy products, Autumn version available at: [http://ec.europa.eu/agriculture/markets-and-prices/short-term-outlook/pdf/2013-09\\_en.pdf](http://ec.europa.eu/agriculture/markets-and-prices/short-term-outlook/pdf/2013-09_en.pdf)

## The 2013 Agricultural year

EU **skimmed milk powder** production is estimated to decrease by 6.3% in 2013 to reach 1 058 000 t and exports are likely to follow the same trend given the tight supply (-23%). Consumption might decline to 671 000 tonnes.

The European production of **fresh dairy products** is expected to maintain stable at 46.8 million tonnes in 2013 with increase foreseen only for cream (+0.7%) while drinking and acidified milk production are going down (-0.4% and -0.2%). Per capita consumption of fresh dairy products as a whole is assumed to contract by a slight 0.4% to 90.7 kg.

**Statistical and economic  
information**

### Codification of the tables

The choices made for the revision of the tables are reflected in a new codification, established on the basis of the same principle for all the tables. Each of them has been given a code with four digits, the first of which designates the subject to which the table refers (see table of contents following this foreword):

1. Conversion rates,
2. Basic data,
3. Economic tables,
4. Tables on agricultural markets.

The second and third digits refer to specific aspects of the field concerned and their significance varies from one field to another.

For the tables concerning the agricultural markets (Tables 4) a standard codification for all the products has been used for these two digits:

- The second digit of the code designates the agricultural product concerned,
- The third digit refers to the nature of the statistic presented:
  - .-.0.-livestock numbers,
  - .-.1.- area, yields and production (crop products) or slaughtering and production (livestock products),
  - .-.2.-world production,
  - .-.3.-external trade,
  - .-.4.-supply balance,
  - .-.5.-prices (producer prices, market prices, consumer prices),
  - .-.6.-market management,
  - .-.9.-various.

For certain sectors, all the possibilities are used (e.g. cereals). For other products only some are used (e.g. potatoes), either because the data needed are not available or because the features of these sectors in the EU do not justify such an exhaustive presentation in a general document such as this, which, for considerations of space, can provide only the most important information.

### Currency units used in this report

According to context, different currency units have been used in this publication. The statistical series in terms of value are also calculated:

- at constant exchange rates, i.e. at the exchange rates obtaining during a specific period (e.g. 1980). These rates are used to eliminate the influences of exchange-rate changes on a time series;
- at current exchange rates (notably for external trade).

To assist the user of this publication wishing to convert units of account into national currencies and conversely, Table 1.0.1, gives the rates to be used. Further information is given in specialized publications of the European Commission.

## Observations on statistical method

### Definition of Agricultural Products for External Trade Statistics

Agricultural products are defined as follows:

#### Chapters 1 – 24 of the Combined Nomenclature excluding fish and fish products:

- chapter 03 fish and crustaceans, molluscs and other aquatic invertebrates
- 0508 fish products
- 0511 91 90 products of fish and crustaceans, ...
- 1604 prepared fish; caviar, and caviar substitutes prepared from fish eggs
- 1605 prepared crustaceans, molluscs, and other aquatic invertebrates
- 1902 20 10 stuffed pasta, containing >20% fish, crustaceans, ...
- 2301 20 flours, meals and pellets of fish or crustaceans, ...

Adding the following products outside the Chapters 1 to 24. ("Other products covered by the Uruguay Round Agreement"):

- 2905 43 mannitol
- 2905 44 D-glucitol (sorbitol)
- 2905 45 glycerol
- 3301 essential oils
- ex 3302 10, – preps containing flavouring agents for beverages  
3302 10 40 –  
3302 10 90
- 3501 to 3505 albuminoidal substances, modified starches, glues
- 3809 10 finishing agents
- 3823 11 stearic acid
- 3823 12 oleic acid
- 3823 13 tall oil fatty acids
- 3823 19 other
- 3823 70 industrial fatty acids
- 3824 60 sorbitol n.e.p.
- 4101 to 4103 hides and skins
- 4301 raw furskins
- 5001 to 5003 raw silk and silk waste
- 5101 to 5103 wool and animal hair
- 5201 to 5203 raw cotton, waste and carded or combed cotton
- 5301 raw flax
- 5302 raw hemp

## Observations on statistical method

### **B – Economic Accounts for Agriculture (EAA): implementation of a new methodology**

1. The Economic Accounts for Agriculture are drawn up according to a new methodology, which was published in the "Manual on Economic Accounts for Agriculture and Forestry EAA/EAF (Rev. 1.1)" (EUROSTAT, 2000, ISBN 92828-2996-0).
2. The introduction of the new methodology has resulted in a number of changes in the data, as a result both of the change in the methodology itself and of the use of new data sources. Some of the changes have had a direct impact on value added and thus on the measurement of agricultural incomes, whereas others have altered only the level of certain aggregates without, however, affecting value added and the measures of agricultural income.
3. The following methodological revisions affecting the measures of agricultural income can be noted:
  - a. The recording of secondary, non-agricultural activities of agricultural units where these activities cannot be separated from the main agricultural activity. This mainly concerns the processing of agricultural products and agri-tourism.
  - b. The exclusion of the output of units producing solely for own-final consumption (e.g. kitchen gardens).
  - c. The exclusion of upstream and downstream production activity involved in seed multiplication.
  - d. The recording of the output of wine and olive oil (from grapes and olives produced on the holding).
  - e. The recording of various operations according to the principle of rights and obligations, meaning that the amounts are recorded during the year in which the claim or obligation, in the economic sense of the term, is created, transformed or removed. For example, the value of subsidies recorded in the accounts for year n corresponds to aid granted in year n even if all or part of the payment takes place in year n+1 or at a later date.
  - f. The reclassification of certain agricultural aid which used to be classed as "operating subsidies" and which will now be recorded as "capital transfers". The value of this aid will no longer enter into the calculation of income.
4. Revisions which have had no impact on the measurement of income (all things being equal) concern:
  - a. The valuation of output at basic prices. The basic price is defined as the price received by the producer, after deduction of all taxes on products but including all subsidies on products.
  - b. The abandonment of the concept of national farm: besides production sold, stocked or for own-consumption by agricultural units, the production of the agricultural industry will now include a part of output used as intermediate consumption by the same unit (for example, grain or forage used in animal feed).

## Observations on statistical method

### C – Annual rate of change (% TAV)

1. The annual rate of change (symbol:% TAV) is used throughout this report for the calculation over periods of time of changes in a given aggregate. It measures the compound annual average increase or reduction, as a percentage, of the variable concerned from a base year (T in the following equations).
2. The annual rate of change is calculated as follows:

$$100 \times \text{Anti-Log} \left[ \text{Log} \frac{(\text{statistic for year } T + N)}{(\text{statistic for year } T)} : N \right] - 100 = \% \text{ TAV}$$

Where the annual rate of change is calculated over only two successive years, N = 1 and the formula becomes:

$$100 \times \left[ \frac{\text{statistic for year } T + 1}{\text{statistic for year } T} \right] - 100 = \% \text{ TAV}$$

3. The following series illustrates the use of this formula:

	1990	1991 ...	1995	1996
Series =	100 000	112 000	161 051	177 156
	1991	1995	1996	
	----	----	----	
	1990	1990	1995	
% TAV	12,0	10,0	10,0	

### Remarks

1. From 1991 data for the former German Democratic Republic are included in the figures for the Federal Republic of Germany and accordingly in the figures for the EU as a whole.
2. Present report was based on data available up to December 2012.
3. From 1 January 1997 statistics for France and Spain have been amended to include the French overseas departments (Guadeloupe, French Guiana, Martinique and Réunion) and the Canary Islands respectively.
4. Data on the Acceding and Candidate Countries are gradually included in our tables. These data are mostly based on the figures provided by Eurostat and the Directorate-General for Agriculture and Rural Development. The process of harmonising the national statistics in the candidate countries is under way. The figures provided are therefore not fully comparable with the figures for the European Union and are expected to be revised frequently. We are publishing them for information only. The Commission cannot be held responsible for how the figures given for these countries are used or interpreted.

(1) Productivity of intermediate consumption is measured by the ratio between the index of the output volume in the agricultural activities sector and the index of intermediate consumption volume.

(2) The 'terms of trade' in agriculture are measured by the ratio between the index of nominal output prices in the agricultural industry and the index of nominal intermediate consumption prices.

(1) See methodological notes (C).

(2) Factor income corresponds to the net value added at factor cost of agriculture.

(3) Besides the output of agricultural goods and services, the output in agricultural activities sector comprises also the output of certain non-agricultural secondary activities.

(4) Other production costs = Fixed capital consumption + compensation of employees + rents and other real estate rental charges to be paid + net interest payments.

Source: European Commission, Eurostat (Economic Accounts for Agriculture).

The Farm Accountancy Data Network (FADN) collects accountancy data from a sample of agricultural holdings in the European Union. The FADN field of survey relates to 'commercial' farms, i.e. farms which exceed a minimum level of economic activity defined by Standard Output based economic size calculation.

In the most recent accounting years there were about 80 000 holdings (Community of 27 Member States) representing commercial farms in the FADN sample.

The terms used in the tables relate to the following definitions.

#### **BASIC FADN TERMS**

##### ***Accounting year***

The accounting year is a 12-month period starting between 1 January and 1 July, the exact date varying from one Member State to another.

##### ***Economic size of the holding***

The economic size of a holding is measured by the total standard output of the holding expressed in euro. Holdings are classified by economic size classes. The total standard output of the holding corresponds to the sum of the values obtained for each characteristic by multiplying the standard outputs per unit by the number of corresponding units. The standard output (SO) presents the value of output corresponding to the average situation in the actual region for each agricultural characteristic. (Commission Regulation 1242/2008/EC).

##### ***Type of farming (TF)***

The type of farming (TF) of a holding is determined by the relative contribution of the standard output of the different characteristics of this holding to the total standard output of this one. A description is given in Table 3.2.2. The results provided in the following tables relate to eight groups aggregated from the 21 principal types of farming of the Community farm typology (Commission Regulation 1242/2008/EC).

##### ***Weighting and number of holdings represented***

The holdings in the FADN sample are selected to be representative for each division by the combination of TF and economic size class. The populations to be represented are derived from the Community farm structure surveys.

The results presented are weighted averages. Each holding in the FADN sample is attributed a weight proportional to the number of holdings belonging to the same type of farming and the same economic size class in the division.

The number of holdings represented is the sum of the weights of the holdings in the sample. Some cells (division – TF – economic size class) may have no holdings in the sample due technical difficulties in surveying holdings.

#### **STRUCTURAL DATA**

##### ***UAA: utilized agricultural area (in hectares).***

##### ***Annual work unit (AWU and FWU)***

This represents the agricultural work done by one full-time worker in one year. Part-time and seasonal works are fractions of an AWU.

An FWU is an AWU of unpaid (family) labour.

#### **AVERAGE RESULTS PER HOLDING**

##### ***Total output***

This is the value of total production during the accounting year. Included are off-farm sales, home-grown feed and seed, farmhouse consumption and benefits in kind, as well as changes in the value of livestock and stocks of crop products.

##### ***Intermediate consumption***

This corresponds to all the fixed and variable costs that are necessary for agricultural activity and includes home-grown feed and seed but excludes financial charges, labour costs, rent and depreciation.

##### ***Depreciation***

This is the annual provision designed to replace the fixed components of working capital at the end of their life (buildings, machinery, equipment, etc.). It is calculated on the basis of replacement value.

##### ***Farm net value-added (FNVA)***

Total output less intermediate consumption and depreciation, adjusted by taxes, grants and subsidies linked to production.

This is an indicator of the economic performance of the holding. It remunerates family and hired labour, own and borrowed capital and the management of the holding.

##### ***Family farm income (FFI)***

This corresponds to farm net value-added, less other real costs in the accounting year: interest and financial charges, wages and social security costs paid and rent.

This indicator represents the return on the labour of farmer and family, and on owned capital.

**3.2.2 The eight types of farming: shares of each enterprise in total output in 2011<sup>(1)</sup>**

(1) Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

(2) Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

(3) Provisional results for 2011.

(4) The totals may not add up due to rounding of the numbers of represented farms.

(1) Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

(2) Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

(3) Provisional results for 2011.

(4) The totals may not add up due to rounding of the numbers of represented farms.

Source: European Commission, DG Agriculture and Rural Development, FADN (population: 2010 structure survey; classification: standard output «2007»).

(1) Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

(2) Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

(3) Provisional results for 2011.

(4) The totals may not add up due to rounding of the numbers of represented farms.

Source : European Commission, DG Agriculture and Rural Development FADN (population : 2010 structure survey; classification : standard output «2007»).

3.2.3 G4 Accountancy results by type of farming - *Permanent crops*

29/11/2013

**Total output - 100 Euro (current)**

**Intermediate consumption**

**Family farm income per unit unpaid labour (FWU)**

(1) Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

(2) Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

(3) Provisional results for 2011.

(4) The totals may not add up due to rounding of the numbers of represented farms.

Source: European Commission, DG Agriculture and Rural Development, FADN (population: 2010 structure survey; classification: standard output «2007»).

3.2.3 G6 Accountancy results by type of farming - *Grazing livestock (excl. milk)*

29/11/2013

**Total output - 1000 Eur (current)**

**Intermediate consumption**

**Family farm income per unit unpaid labour (FWU)**

(1) Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

(2) Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

(3) The national results for 2011.

(4) The totals may not add up due to rounding of the numbers of represented farms.

Source: European Commission, DG Agriculture and Rural Development, FADN (population : 2010 structure survey, classification : standard output &lt;2007&gt;).

3.2.3 G8 Accountancy results by type of farming - Mixed (crops + livestock)

29/11/2013

Total output - 1000 Eur (current)

Intermediate consumption

Family farm income per unit unpaid labour (FWU)

## 3.2.4 Results by economic size of holding (2010 and 2011) (\*)

Economic size of holding in standard output	Number of holdings in the FADN field of observation (4)		Area (ha UAA)		Average results per holding in (1 000 EUR) (current)

(1) Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

(2) Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

(3) Provisional results for 2011.

(4) The totals may not add up due to rounding of the numbers of represented farms.

(1) The EU index of farm input prices is a Laspeyres index, whereas the deflated price series (see Table 3.1.8) is a Paasche index. The discrepancies between the figures in the two tables are mainly a matter of the differing index formulae. Purchase price of inputs' and 'Producer prices for agricultural products' are harmonized indices, whereas 'Farm wages' remain heterogeneous national indices.

(2) Indices of the prices of goods and services of current agricultural consumption.

(3) Annual indices include fruit and vegetables.

(3) Source: Draft general budget 2014 adopted on 26/06/2013

(4) An amount of 673.1 mio Eur paid from revenue assigned to direct aids is included.

(5) The credits shown for this item are lower than the needs by 1 033 mio Eur in 2013 and by 600 mio Eur in 2014 because of estimated amounts from assigned revenue available to the item 'Single payment scheme'.

(6) For the draft budget 2014, the appropriations indicated for direct aids are after applying financial discipline.

(7) No longer financed by the EAGF as of 2014.

(8) Excluding Horizon 2020 - Research and innovation related to agriculture (chapter 05 09) and European Globalisation Adjustment Fund (chapter 05 10).

**3.4.4 Breakdown of EAGF\* expenditure by sector according to the economic nature of the measures. 2012 financial year**

### National expenditures for agriculture - 2012

There are several sources of Community statistics enabling employment in agriculture to be measured from various viewpoints, including employment statistics proper (labour force sample survey) and agricultural statistics (structural surveys of agricultural holdings). Methods and concepts vary from one source to another, and the purpose of this introduction is to help the user to choose, among the statistics given in the subsequent tables, those which will provide him with the information he seeks.

**EMPLOYMENT IN AGRICULTURE AND IN THE OTHER SECTORS**

One approach to employment in agriculture consists in considering it as a part of overall employment and comparing it with employment in the other economic sectors. The relevant information comes from labour market statistics; in these figures, the persons employed are assigned to that economic sector in which they mainly work, and the characteristics of employment are measured according to identical concepts from one sector to another. Changes over time in numbers employed in the various sectors, and, in particular, in agriculture, as well as detailed information on the structure of employment in agriculture compared with that of other sectors (breakdown by sex, by occupational status, by working time, or by age) are given by the labour force survey, which provides a 'photograph' of employment in any given year (Tables 3.5.1.2 to 3.5.1.4).

**EMPLOYMENT IN AGRICULTURAL HOLDINGS**

Only the statistics which have just been presented allow a proper comparison of employment in agriculture with employment in the other sectors. However, they do not cover all persons employed in agriculture: an important feature of farming is that so many farmers and farm workers work only part-time and often also have other jobs. In the employment statistics, such persons are not classified as working in agriculture.

A full measure of employment in agriculture is provided by the surveys on the structure of agricultural holdings; it should be noted that the information from this source enables employment in agriculture to be analysed as such but that, as it is established according to specific definitions, it cannot be compared with employment data for other sectors.

These surveys cover all persons employed on holdings, whether farming is their main activity or not; they also record working hours and any other remunerated work outside farming. They thus enable employment on agricultural holdings to be measured fully, and part-time and combined other employment to be analyzed. By conversion of the numbers of persons employed into full-time equivalent workers ('annual work units' – AWU), the data on working hours give information on the actual volume of labour devoted to farming, the only valid measure of the labour contribution to agriculture, in view of the scale of part-time working (Tables 3.5.1.5 and 3.5.1.6).

\* Data for 2010 stem from the Farm Structure Survey 2010, conducted in the form of a census. A number of Member States have changed their thresholds for holdings to be included in the survey, which also has an impact on the labour force data. Comparisons between 2010 and earlier years need to take these threshold changes into account.

\* From 2010 onwards, spouses are no longer a separate category of labour but are merged with the other family members.

\* Percentages presented in this table for persons and AWU use different reference values - for persons, it is the regular labour force, while for AWU it is the labour force employed directly by the holding (including the non-regular non-family labour force).

\* Data for 2010 stem from the Farm Structure Survey 2010, conducted in the form of a census. A number of Member States have changed their thresholds for holdings to be included in the survey, which also has an impact on the labour force data. Comparisons between 2010 and earlier years need to take these threshold changes into account.

\* From 2010 onwards, spouses are no longer a separate category of labour but are merged with the other family members.

\* Percentages presented in this table for persons and AWU use different reference values - for persons, it is the regular labour force, while for AWU it is the labour force employed directly by the holding (including the non-regular non-family labour force).

(1) Sole holders who are also managers. The holder is the person for whom and on whose behalf the holding is farmed; the manager is the person responsible for the current, day-to-day management of the holding. In EU-25 in 2003, 93 % of agricultural holdings were farmed by holders who are also managers.

(2) Holders working their farms for respectively 100 %, 50 to < 100 %, and less than 50 % of the annual working hours of a full-time worker.

(1) Sole holders who are also managers. The holder is the person for whom and on whose behalf the holding is farmed; the manager is the person responsible for the current, day-to-day management of the holding. In EU-25 in 2003, 93 % of agricultural holdings were farmed by holders who are also managers.

(2) Holders working their farms for respectively 100 %, 50 to < 100 %, and less than 50 % of the annual working hours of a full-time worker.

(1) Sole holders who are also managers. The holder is the person for whom and on whose behalf the holding is farmed; the manager is the person responsible for the current, day-to-day management of the holding. In EU-25 in 2003, 93 % of agricultural holdings were farmed by holders who are also managers.

(2) Holders working their farms for respectively 100 %, 50 to < 100 %, and less than 50 % of the annual working hours of a full-time worker.

Source: European Commission, Eurostat (Surveys of the structure of agricultural holdings).

<sup>(1)</sup> Data on the turnover of holdings coming from other gainful activities are available just for 2010. Eurostat did not collect, nor estimate data of turnover in percentage bands for 2005 and 2007.

<sup>(2)</sup> A new classification variable from 2010 defined as the share of the turnover of the activities other than agricultural and directly related to the holding in the total turnover of the holding. It includes activities for which either resources of the holding or its products are used e.g. processing of farm products, contractual work inside or outside the agricultural sector, forestry etc.

EU-total													

(1) Total determined area used for the calculation of the coefficient of reduction supplied by the Member States and subject to verification and control by the Commission.

(2) Regulation (EC) No 1121/2009 - Annex VIII (as applicable in 2012 calendar year)

The agricultural area under the single area payment scheme set out in Annex VIII of Commission Regulation (EC) No 1121/2009 is a regulatory area used to calculate the national aid amount per hectare. The total number of eligible area declared by the farmer in a given calendar year may vary from that area.

<sup>(1)</sup> In the EU all area cultivated under GMOs for commercial purposes refers to maize (Bt maize) and potato (in 2010 and 2011: "Amflora" in the Czech Republic, in Sweden and in Germany on 150 ha, 80 ha and 15 ha, resp.). In third countries the GMO can be soya, maize, cotton, rapeseed and sugarbeet. Potatoes, tobacco, squash, papaya and sweet pepper GM varieties were cultivated in very small areas.

Sources: Competent authorities of EU Member States, USDA, FAO and ISAAA.
